

CIGRE Green Book

CIGRE as the world's leading organization for electric power networks has been promoting the exchange of knowledge since its very beginning in 1921. By starting the "CIGRE Green Book" series, CIGRE follows the vision to create the best possible reference books available in the market on the various subjects of electrical power networks as dealt by CIGRE and its Study Committees. These books should be self-consistent, have a handbook character and be recognised by the engineering community as the top reference books in their fields.

29/08/2014, Palais des Congrès de Paris : Ceremony book signing

The artist Elena Paroucheva is invited to the book signing. Her sculptures - towers are published in the "Green Book" as an example of innovative solutions for power lines. With Klaus FRÖHLICH - president of CIGRE, Philippe Adam - General Secretary, Konstantin Papailiou - book publisher.
